## The Cancer Research Centre Georges-François Leclerc accelerates its digital transformation with Softway Medical Hospital

A pioneer in oncology and research in Bourgogne-France-Comté, the Centre Georges-François Leclerc - where 1,000 professionals support over 26,000 patients every year - has taken a decisive step towards modernizing its IT system by choosing Hospital Manager, the healthcare ERP from Softway Medical Hospital. This partnership highlights Softway Medical Hospital's ability to meet the specific challenges of Cancer Centers with modern technologies, an agile methodology and a long-term vision of innovation.

« With eNov30, Softway Medical Group offers more than just a technology roadmap: it's **an ambitious vision backed by concrete innovations**. We have clear insight on what is achievable today and what will transform our organization tomorrow. This transparency **is essential for building a long-term relationship and aligning our business challenges with forward-looking solutions**. »

**David SEVERIN**

Information Systems Director, Centre Georges-François Leclerc

## Centre Georges-François Leclerc welcomes Softway Medical Group's eNov30 program...

As a leading oncology hospital and research center, the Centre Georges-François Leclerc **is keenly interested in innovation**. Its aim? To exploit the full potential of its data and consolidate its role as a forerunner.

With eNov30, Softway Medical Group provides a clear and concrete innovation trajectory. For example, it integrates **artificial intelligence** applied to the Medicalisation of Information Systems Programme and is already developing a **disruptive no-code approach**. These were decisive factors in the Centre Georges-François Leclerc's choice of DPI.

« *No-code is a game-changer. It will offer **unprecedented autonomy to our teams**, who will be able to adapt screens and business workflows without any technical skills. This flexibility is essential if we are to adjust our tools rapidly to changing needs, while reducing our dependence on external developments.* »

**David SEVERIN**

Information Systems Director, Centre Georges-François Leclerc

Furthermore, **with the recent acquisition of Epicconcept**, the European leader in digital prevention and screening, Groupe Softway Medical **is accelerating its capacity to transform epidemiological surveillance and population monitoring**. This strengthened expertise opens up new perspectives for public health and responds to the strategic challenges facing Cancer Research Centers.

### ...And a high-performance, agile infrastructure

The choice of Hospital Manager was also motivated by **a desire to urbanize the information systems ecosystem (ISE)**. The aim was to simplify systems management, improve resource management and guarantee service continuity.

With **thirty available modules and a high level of parameterization**, Hospital Manager ERP offers a unified solution capable of meeting the needs of healthcare professionals, while guaranteeing continuity of service thanks to **SaaS mode on its Sovereign Cloud**: « *90% of our customers choose SaaS to free themselves from maintenance and security constraints. Our teams take care of service continuity and technological upgrades, **enabling establishments to concentrate on their core business.*** »

**Ludovic LARGERON**

Infrastructure Sales Director, Softway Medical Group

### Collective mobilization to serve healthcare professionals and patients

« *We're very proud to place our solutions and expertise at the service of a key player in the fight against cancer and to commit ourselves alongside them in their mission to promote equal opportunities for access to care and innovation.* »

**Olivier BOUCHET**

Sales Director, Softway Medical Hospital

The rollout of patient administrative management and Electronic Patient Record is scheduled to take **18 months**, and will **involve around thirty people on both sides**.

This close collaboration is a key factor in the success of the project's deployment, and reflects a collective dynamic at the service of one vision: **to inspire e-health and shed light on new uses, to contribute to improved care and the emergence of preventive medicine for the benefit of all citizens.**

## About Centre Georges-François Leclerc

Recognised as a public utility, this reference hospital and research centre is the only health establishment in the Bourgogne Franche-Comté region dedicated exclusively to cancer research. Patients benefit from excellent care and therapeutic innovations, with no extra charges.

Nearly 1,000 professionals (including 160 doctors and 105 researchers) provide support for 26,000 patients and their families every year.

From fundamental to epidemiological research, its projects are always geared towards the direct benefit of patients.

Thanks to its multidisciplinary teams, the Centre Georges-François Leclerc (CGFL) is a referral centre for rare tumours.

A fervent advocate of equal opportunities for access to care and innovation, the Centre is committed to working alongside numerous regional, national and international partners.

## About Softway Medical Group

Inspiring digital healthcare means informing and enabling the evolution of practices for healthcare professionals and patients.

For 25 years, we have been guided by our keen vision of the healthcare market and its changes. We don't follow the trend, we anticipate it and sometimes even provoke it.

Thanks to the strengths of the Group, we are ensuring that the practices and customs of tomorrow become a reality today. In doing so, we are shedding light on and enabling the evolution of customs, to allow healthcare professionals to be ever more efficient and patients to become actors of their own health.

At Softway Medical Group, we are pragmatic visionaries.

In France, Belgium and Canada, with more than 1,200 employees, our solutions equip more than 200,000 healthcare professionals in private and public establishments, in town medical practices, in imaging centers and technical platforms and in biology. As a publisher, integrator and host of health data, our unique positioning allows us to break down silos, improve the patient care pathway and contribute to prevention for all citizens.
